

HIGH-SPEED, HIGH-PRODUCTIVITY  
HORIZONTAL MACHINING CENTER

# NHP

**5500**

**2<sup>nd</sup> Generation**

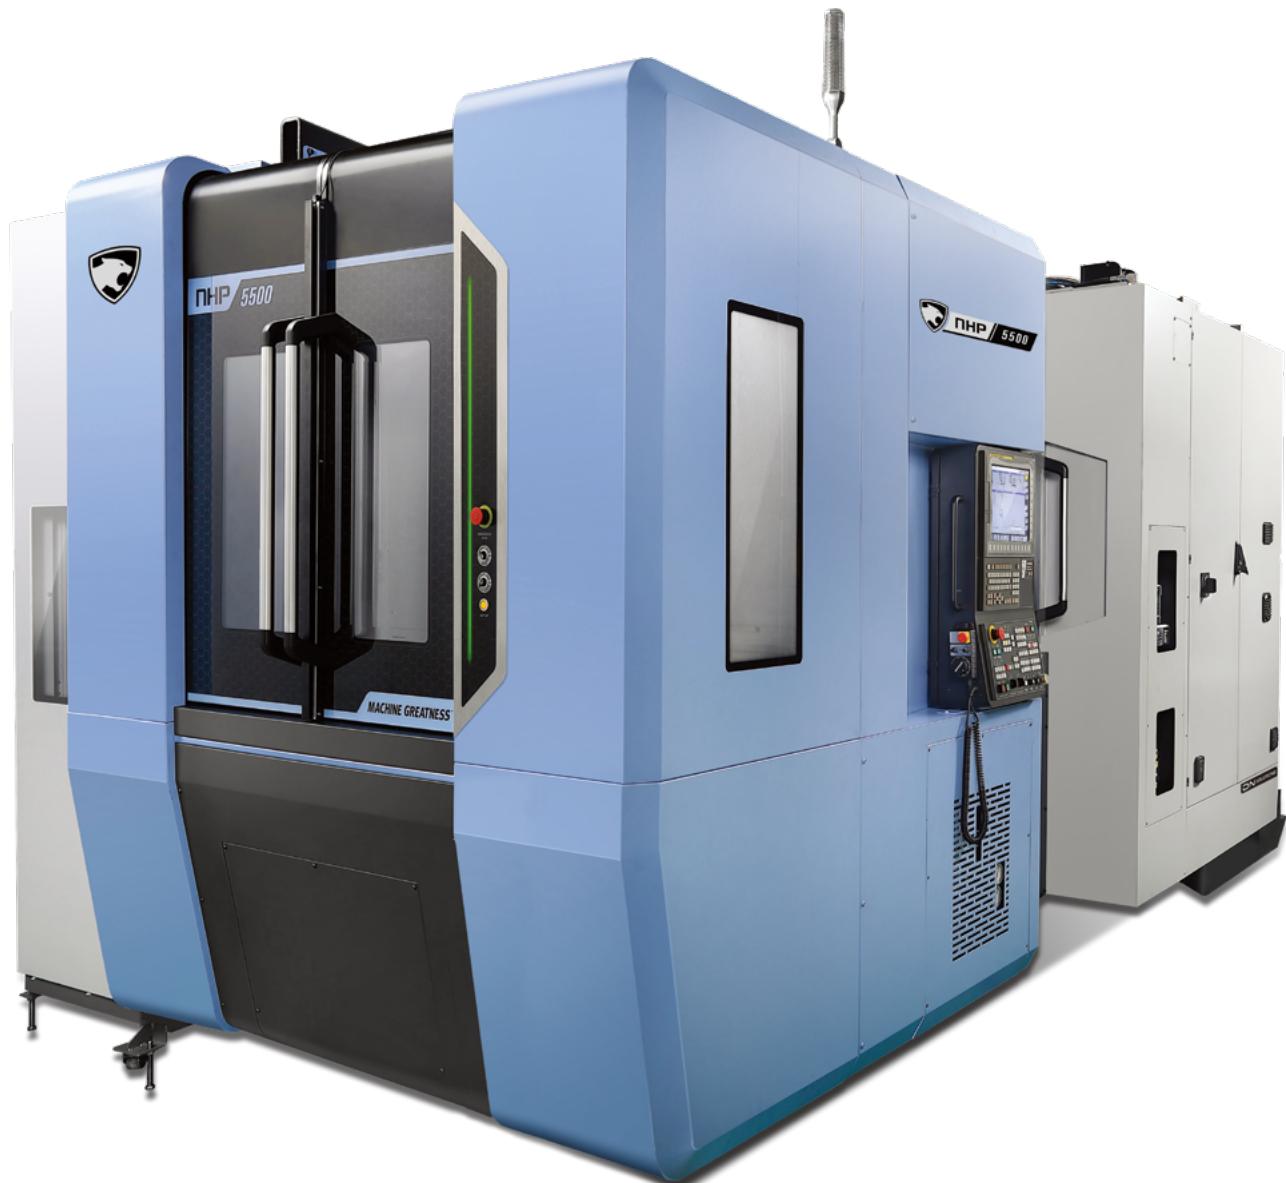

**DN SOLUTIONS**

# NHP 5500 2<sup>nd</sup> Generation

---

NHP 5500<sup>2<sup>nd</sup></sup> considerably improved the productivity with faster X/Y/Z feed acceleration/deceleration, shorter tool change time and faster table rotation time. And it secured improved machining accuracy with spindle smart thermal control, X/Y/Z all axis ball screw shaft and nut cooling and 3-point support structure equipped as standard. Also provided are various automation solutions and the chip removal function, ensuring stable continuous machining for long periods of time.

## ENHANCED PRODUCTIVITY

- Higher productivity and the minimum non-cutting time are accomplished through Y/Z feed axes acceleration and deceleration of more than 1G (X/Y/Z acc/dec 0.91/1.07/1.02G respectively), rapid traverse rate of 60m/min and the short tool change time (T-T-T) of 1.7 seconds.

## LONG-LASTING HIGH PRECISION

- Long-term, high-precision machining is ensured on a stable basis through such features as 37KW built-in spindle equipped with the thermal displacement sensor, X/Y/Z high-speed, high-precision roller LM guide with a ball screw shaft and nut cooling function applied in the standard model and a 3-point support-type bed structure.

## VARIOUS AUTOMATION SOLUTIONS/CONVENIENCE FUNCTIONS

- Expandable up to 72 pallets using the LPS or RPS pallet automatic changer, and the hydraulic/pneumatic fixture line can be built into the table of the pallet bottom.

# BASIC STRUCTURE

A high level of precision can be achieved on a stable basis thanks to the 3-point support type bed structure and the X/Y/Z ball screw shaft and nut cooling function.

## Travel distance

X axis  
**800** mm  
31.5 inch

Y axis  
**750** mm  
29.5 inch

Z axis  
**900** mm  
35.4 inch

## Feed axis acceleration/deceleration

X axis  
**0.91** g

Y axis  
**1.07** g

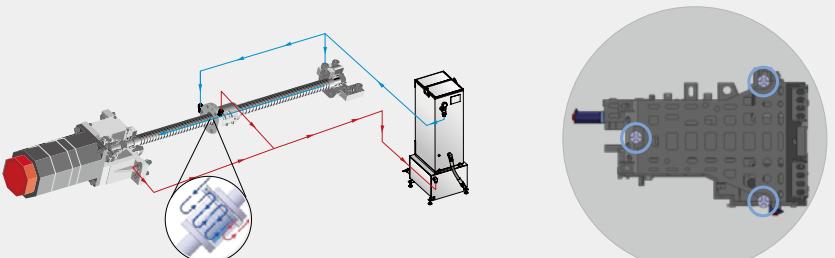

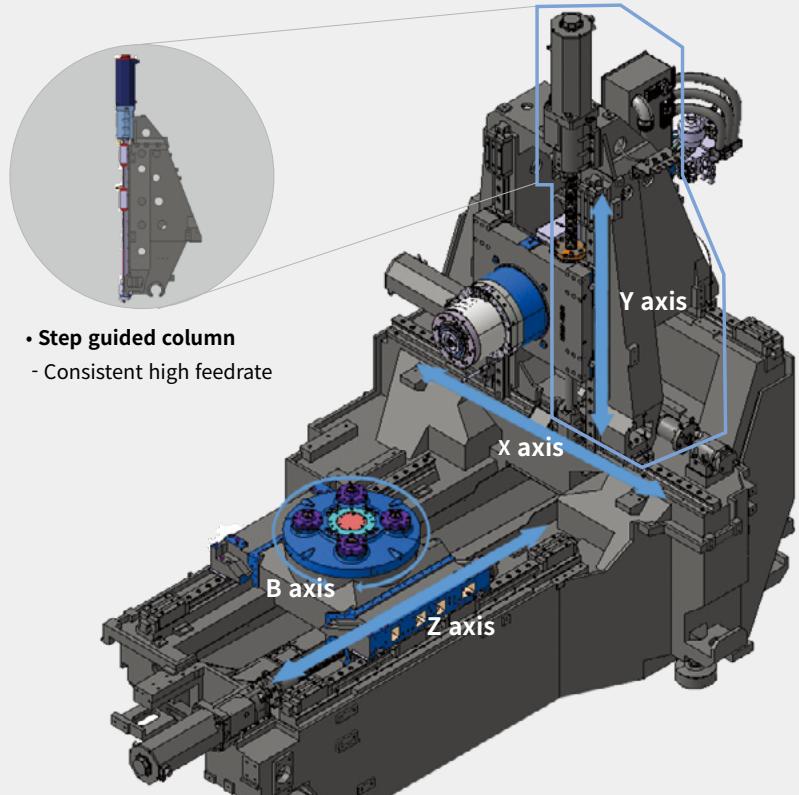

Z axis  
**1.02** g

## Rapid traverse rate

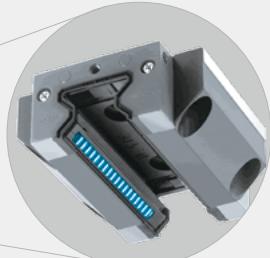

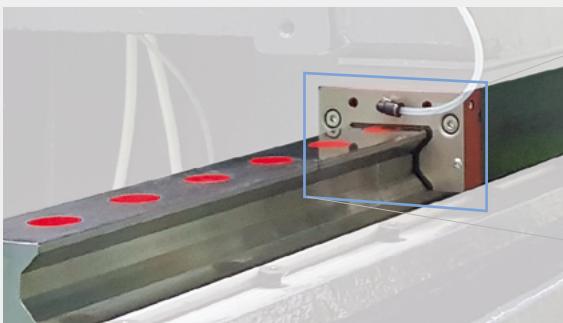

**60** m/min  
2362.2 ipm

## Fast precision X/Y/Z/ feed structure

Productivity has been greatly increased with the high-speed, high-precision roller type LM guideway installed for X/Y/Z entire axes and the acceleration/deceleration performance of more than 1G

- Ball screw shaft and nut cooling
  - Reduced thermal displacement for feed axis and consistent high precision
- 3-point support type bed structure
  - Leading to the positional stability of the machine ensuring accuracy

High-rigidity, high-precision roller type LM guideway

# TABLE

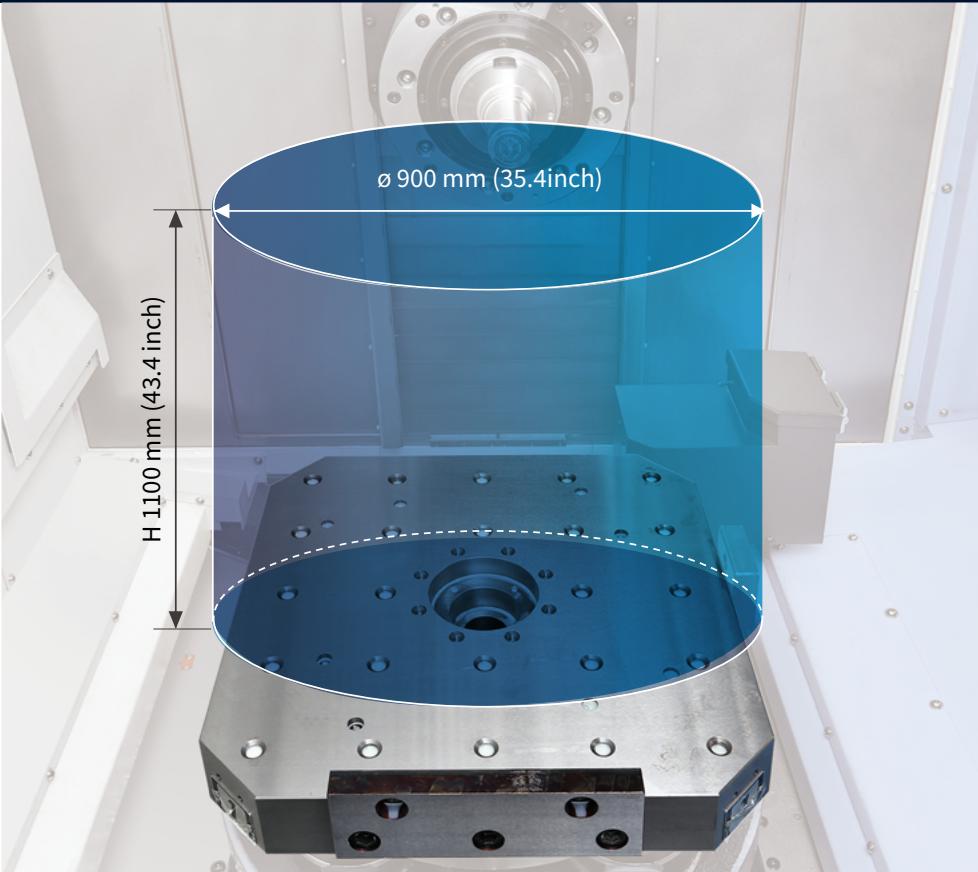

Rotary shuttle-type pallet changer can be operated on a stable and accurate basis, enhancing its reliability.

## Max. workpiece size

**Ø900 x H1100 mm**

35.4 x 43.3 inch

Machinable work size is enlarged in comparison with the previous model by increasing the efficiency of machine interior space (while reducing the space of installation).

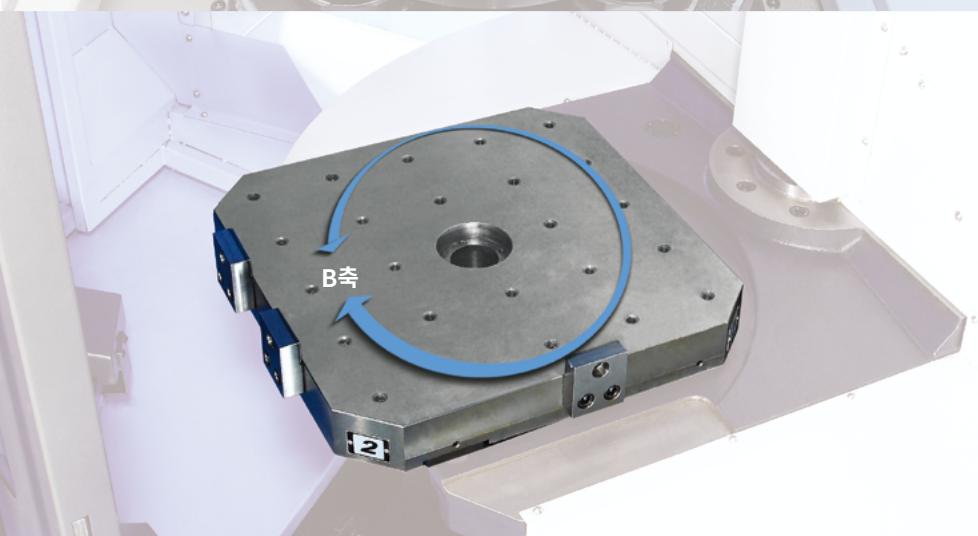

## Max. workpiece weight (W)

**800 kg** 1763.7 lb

**1000 kg** 2204.6 lb option

## Pallet change time

**12 sec, 15 sec** option

## Table rotation (B axis)

1° control index table:

Capable of high-speed rotation; 90 degrees 1.1 seconds and 180 degrees 1.5 seconds

0.0001 degrees RGC\* type rotary table option:

Max. allowable rotative speed 30 r/min

0.0001 degrees DDM\*\* type rotary table option:

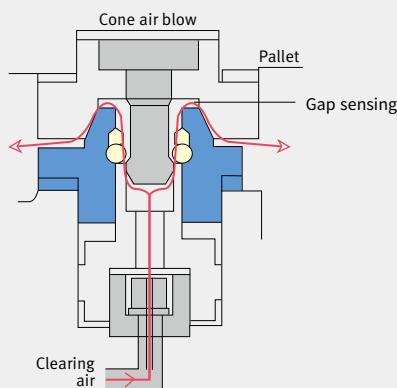

Max. allowable rotative speed; high speed 100 r/min

\*Roller Gear Cam

\*\*Direct Drive Motor

## Cone Air Blower

As a mechanism designed for precise pallet position repeatability, the air blower injects high pressure air into the location cones connecting the table to the pallet. This removes chips from the locating surfaces and ensures highly accurate pallet positioning.

# SPINDLE

This built-in spindle minimizes the occurrence of vibration and heat generation. It's equipped with sensor-type spindle smart thermal error compensation, providing excellent high-speed, high-precision cutting performance.

## Spindle cooling system (oil cooler) available in the standard model

### Max spindle speed

**10000** r/min

**15000** r/min option

### Spindle tool taper

**ISO #50**

### Max. spindle motor power

**37** kW 49.6Hp

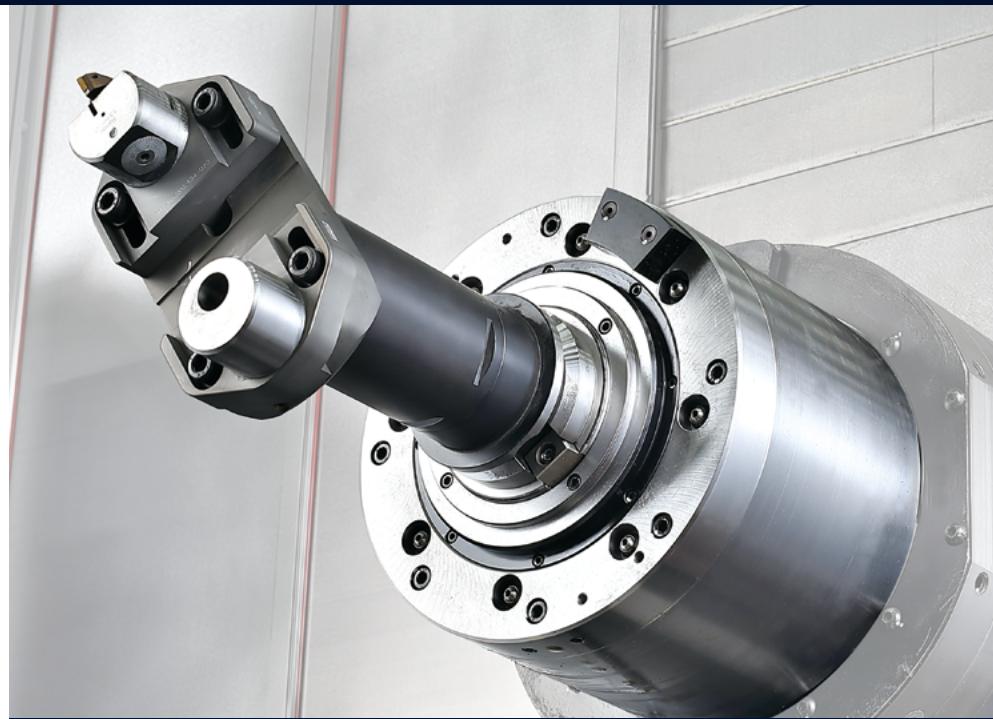

**45** kW 60.3Hp (High Torque) option

### Max. spindle motor torque

**516** N.m 380.8 ft-lbs

**644** N.m option

475.3 ft-lbs (High Torque)

### Spindle Cooling System

An oil cooler system is provided as a standard feature for long-term, continuous operation at high speeds. The oil is cooled down in the cooler before circulating around the spindle bearings and built-in motor to minimize thermal error and deliver high-precision cutting.

## High-Speed, high-precision spindle

Designed to minimize vibration and thermal error while offering rapid acceleration and deceleration, the spindle guarantees excellent cutting performance from steel to nonferrous metal parts. Thanks to its increased rigidity, the spindle supports various machining from high speed cutting to low speed heavy cutting.

## Spindle cooling system and spindle smart thermal control function available in the standard model

The oil cooler system as well as the spindle thermal error compensation function is provided in the standard model to keep the level of spindle heat generation and thermal error to a minimum.

# MAGAZINE

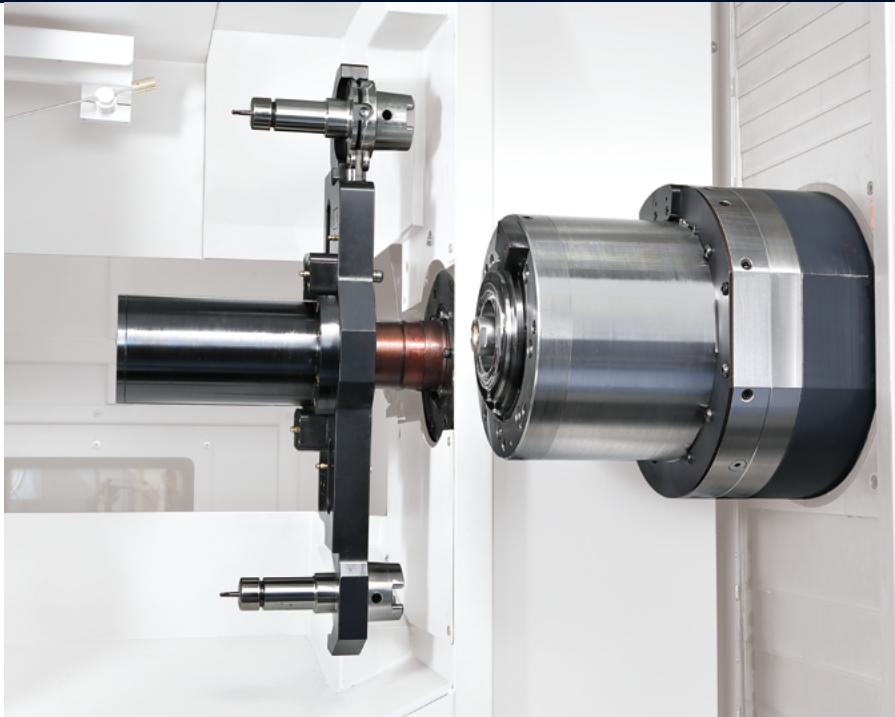

Varied types of the tool magazine are provided for enhanced customer convenience.

## Tool changer

### Tool magazine capacity

**40** ea

{60, 90, 120, 150, 196, 256,  
316, 376} option

### Tool change time

Tool To Tool(T-T-T) **1.7** sec  
Chip To Chip(C-T-C) **4.7** sec

### Max. tool length

**550** mm 21.7 inch (BT/CAT/DIN)  
**640** mm 25.2 inch (HSK)

### Max. tool weight

**25** kg 55.1 lb (40/60T)  
**30** kg 66.1 lb (More than 90T)

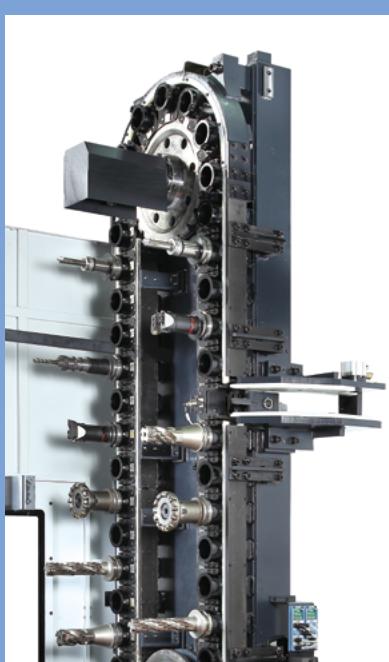

### Servo-driven ATC

The ATC is capable of handling pot-type tools weighing up to 25kg and chain-type tools weighing up to 30kg at high speeds using a servo motor and fast tool indexing and spindle positioning.

## Tool Magazine type

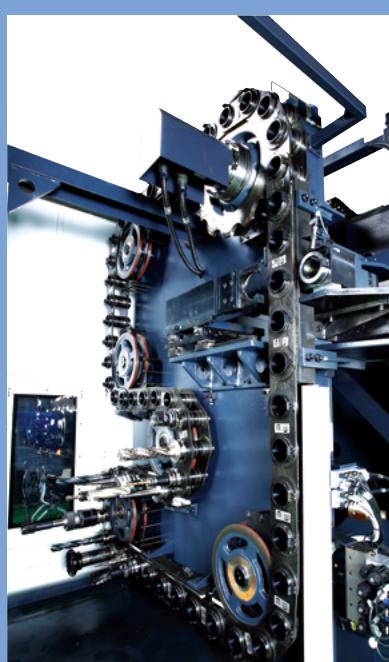

### Pot type magazine

40 / 60 tools option

### Chain type magazine

option  
90 / 120 / 150 tools

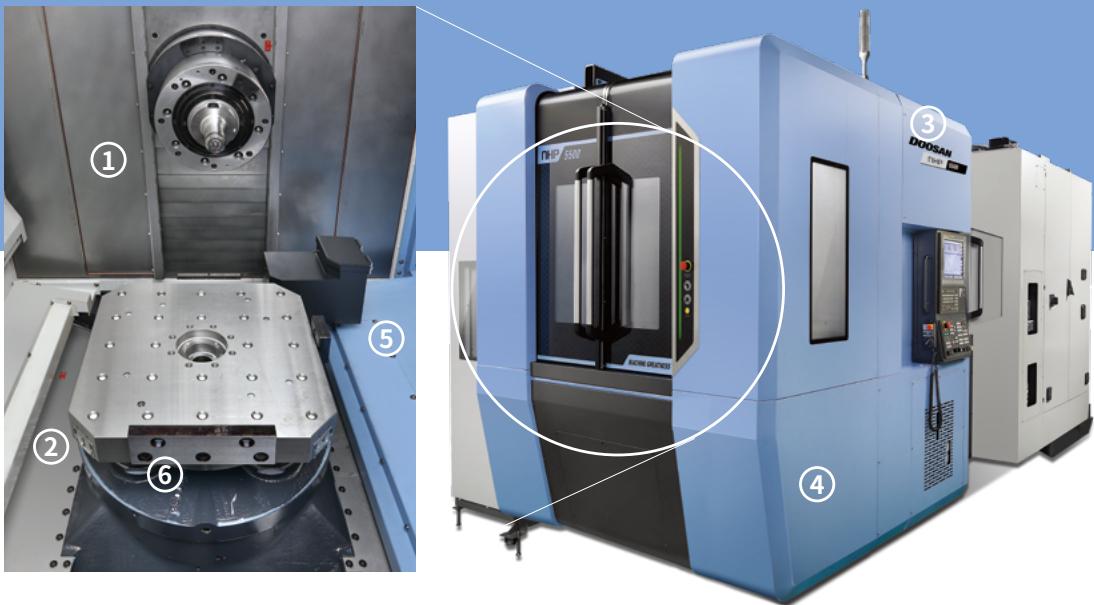

### Matrix type magazine

option  
196 / 256 / 316 / 376 tools

# HIGHER ACCURACY PACKAGE

Going a step further to a higher level of machining accuracy can be achieved by selecting the "Higher Accuracy Package" during high precision machining, i.e. for eco-friendly vehicles, aviation and precision machinery requiring stricter machining tolerance.

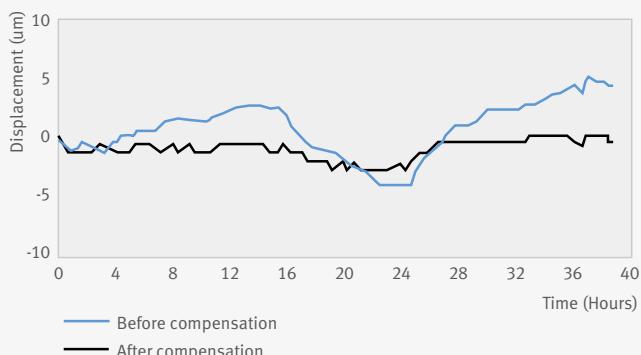

## 1. Structure smart thermal control

- X/Y/Z structural thermal displacement less than 7 $\mu\text{m}$

### Less than 7 $\mu\text{m}$

(Measuring thermal displacement when atmospheric temperature varies by 6 degrees for 40 hours)

\* The results, indicated in this catalogue are provided as example. They may not be obtained due to difference in cutting conditions and environmental conditions during measurement.

## 2. X/Y/Z linear scale

- X/Y/Z all axes
- Retaining long-term positioning and repetition accuracy

## 3. Mist collector

## 4. Coolant chiller

## 5. Strict manufacturing process to realize high precision

- Special heat treatment (Body Frame)
- Enhanced precision maintenance for each assembly process

## 6. Pallet clamp confirmation

# STANDARD | OPTIONAL SPECIFICATIONS

A range of options is available to suit individual requirements.

• Standard   o Optional   x Not applicable

\* Please contact DN Solutions to find out more about specifications and options

 Fire Safety Precautions There is a high risk of fire when using non-water-soluble cutting fluids, processing flammable materials, neglecting the controlled and careful use of coolants and modifying the machine without the consent of the manufacturer. Always check the SAFETY GUIDELINES carefully before using the machine.

# PERIPHERAL EQUIPMENT

## Chip Conveyor option

Chip disposal is very important to productivity and the work environment. To meet this requirement, the NHP Series enhances chip disposal performance, thus improving the work environment.

Scrapers type drum chip conveyor

## Eco-Friendly Devices

Oil skimmer

Mist collector option

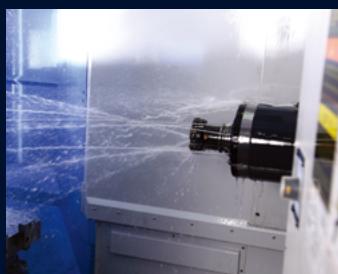

## Chip disposal solution

A solution for smooth chip disposal is provided to prevent any deterioration in accuracy and productivity caused by the chips that are stuck or piled up

## Chip Removal System

FLUSHING COOLANT

FLOOD COOLANT

SHOWER COOLANT option

COOLANT GUN option

COOLANT FLUSHING ON THE SPINDLE HEAD

SPINDLE-THROUGH COOLANT (TSC) option

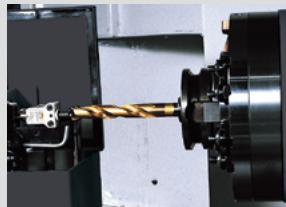

MQL SYSTEM option :SPRAYING ECO-FRIENDLY OIL MIXED WITH AIR, INSTEAD OF CUTTING OIL

# PERIPHERAL EQUIPMENT

## Measuring Devices

Auto tool damage detection device I (BK 9) option

Auto tool damage detection device II (OMRON) option

Automatic tool measuring device (TS 27R) option

## Coolant Chiller option

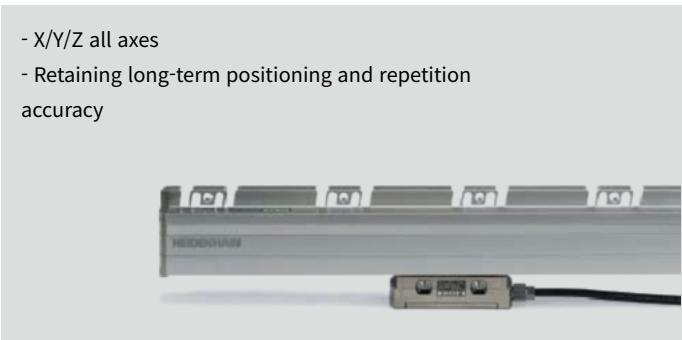

## SFC(Sludge Free Coolant tank) option

This coolant tank system is intended for automatically eliminating the fine chips and sludge deposited on the bottom of the tank.

- Preventing the sludge from being deposited by causing the coolant to flow.
  - Collecting and separating sludge using the cyclone filter and the additional pump
- 
- Extending coolant life (Cost saving)
  - Reducing the frequency of cleaning  
(Machine operating ratio and productivity increased)
  - Best suited for unmanned automation solutions

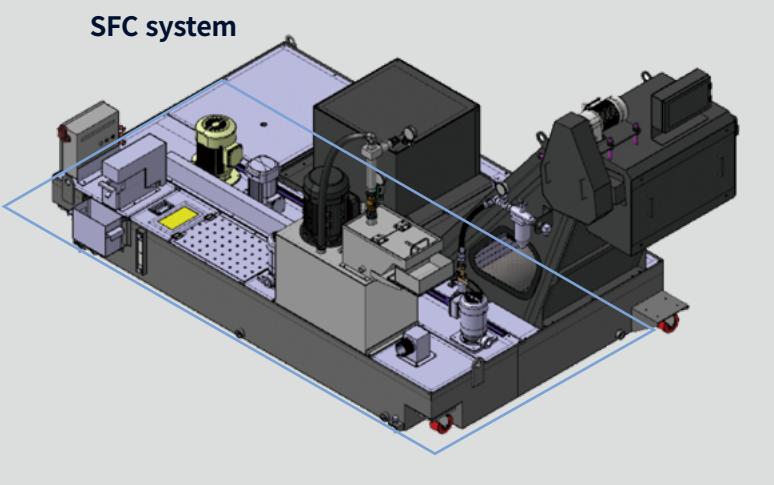

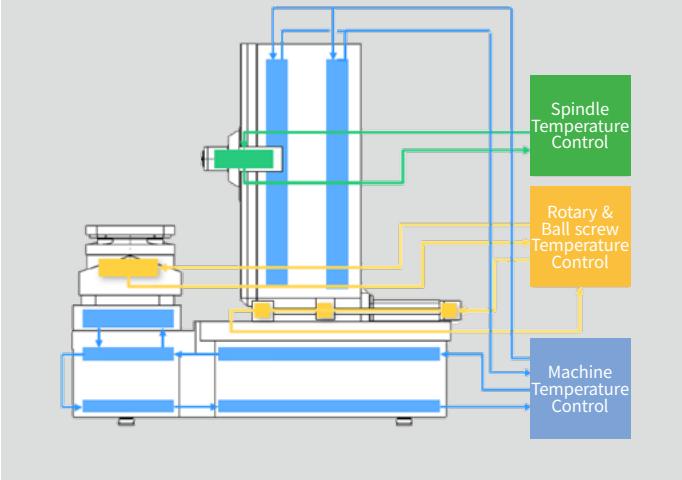

## Linear scale available in the standard model option

- X/Y/Z all axes
- Retaining long-term positioning and repetition accuracy

## Spindle Smart Thermal Control (Std.) Structure Smart Thermal Control option

Structure (Bed, column, X-axis base)  
thermal error stabilized

# PERIPHERAL EQUIPMENT | CONVENIENT FUNCTIONS

This operator-oriented design is intended for providing the customer with convenience and safety.

## User-oriented design

Internal footing and an anti-door-lock function are provided to prevent the operator from being locked in the machine and to guarantee the operator's safety. The installation of a centralized service unit and screen panel enhances the operator's convenience.

Coolant flushing on the spindle head to keep clean from chips over the spindle

ATC screen panel

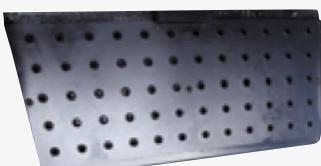

Spindle-through coolant spray device of semi-permanent service life, enabling convenient maintenance and cost saving

option

Safety has been improved with machine internal footings

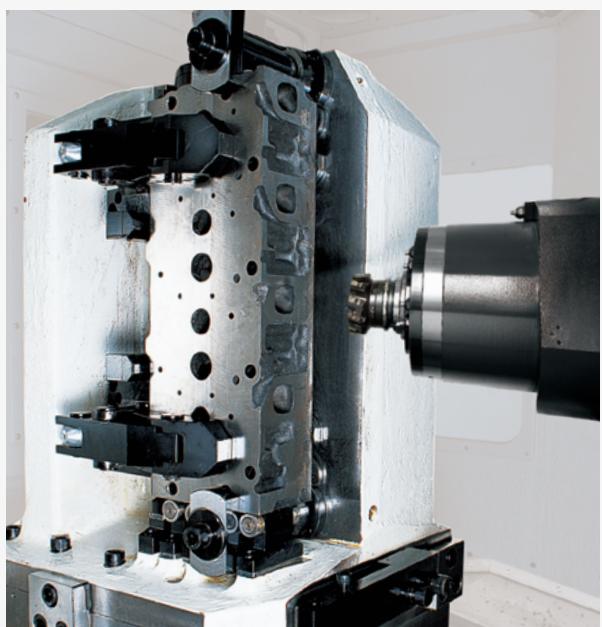

## Application

We offer a wide range of solutions that can be optimized to suit each customer's needs.

### Clamping Fixtures

The following hydraulic and pneumatic fixture options are available for setting up workpieces:

**List of workpiece clamping fixtures (hydraulic/pneumatic)** option

Hydraulic/pneumatic fixture pot

- A/B Line : 2, 4, 6, 8 Pairs (Including solenoid valve)
- P/T Line : 2, 4, 6, 8 Pairs (Solenoid valve not included)

- motor
- 2.2 kW / 7MPa
- 3.7 kW / 15MPa
- 5.5 kW / 21MPa

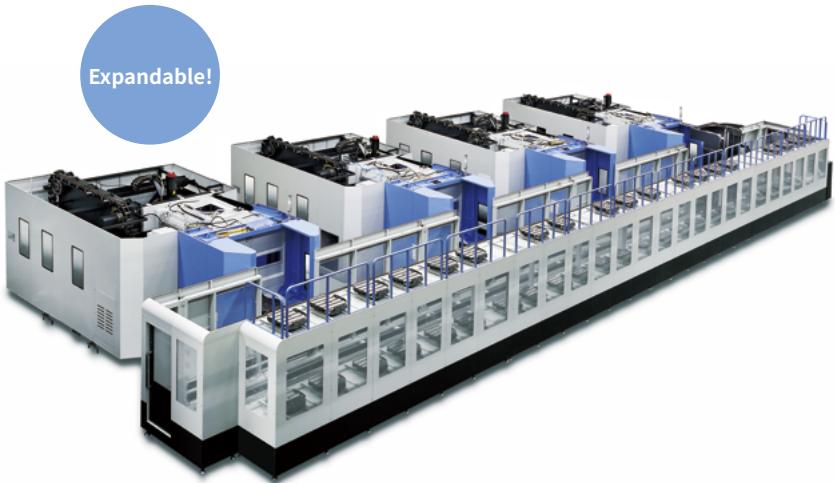

\*Please provide us with detailed specifications on the order sheet

### Hydraulic/pneumatic fixture lines on the pallet bottom

Hydraulic/pneumatic fixture lines can be built into the table of the pallet bottom to increase the efficiency of the machine interior space, creating a safer working environment.

# LINEAR | ROUND Pallet SYSTEM

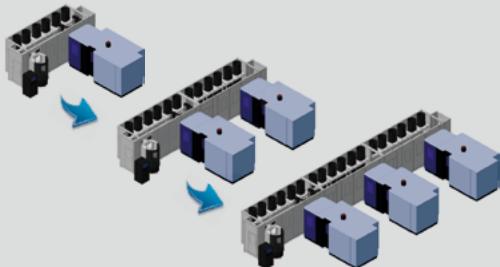

## LPS 5500

LPS 5500 are wonderfully designed, allowing them to provide a high level of automation system for the customers.

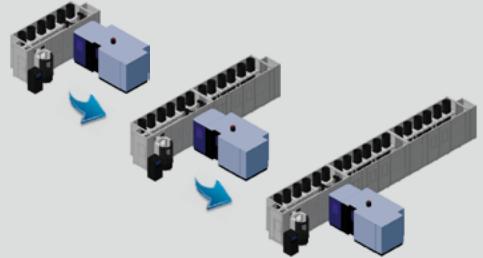

### Features

- Servo-driven system providing reliability
- Easy to install
- Simple on-site modification

### Improved Productivity

### Extended automation run-time

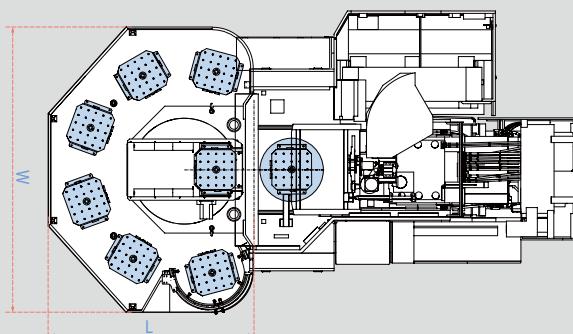

## RPS 5500

Compact automation system for BT 50 HMC machines

### Features

- Servo-driven system providing reliability
- Easy to install
- Simple on-site modification

### Dimensions

Models	Width (W)	Length (L)
NHP 5500	mm (inch)	3848 (151.5)

# FANUC 31i/32i PLUS

Fanuc 31i/32i Plus maximizes customer productivity and convenience.

## 15" Touch screen + New OP

DN Solutions Fanuc 31iB/B5 Plus' operation panel enhances operating convenience by incorporating common-design buttons and layout. It features a Qwerty keyboard for fast and easy data input and operation.

## Fanuc 31i/32i Plus

- 15-inch color display
- Intuitive and user-friendly design

## USB and PCMCIA card QWERTY keyboard

- EZ-Guide i standard
- Ergonomic operator panel
- 4MB Memory
- Hot keys
- Enhance AICC BLOCK
- Touch pen provided as standard

## iHMI touchscreen

iHMI provides an intuitive interface that uses a touchscreen for quick and easy operation.

## Range of applications

Providing various applications related to planning, machining, improvement and utility, for customer convenience.

# EZ WORK

The software developed by DN Solutions features numerous functions designed for convenience and ease of operation.

## EZ work

The EZ work package delivers speed and efficiency. This menu-driven innovation not only helps customers reduce setup times, but also simplifies common tasks and procedures, reducing the potential for errors. EZ work reduces operating time, protects machinery, enhances quality and speeds up maintenance interventions.

## Tool support functions

### Tool management I

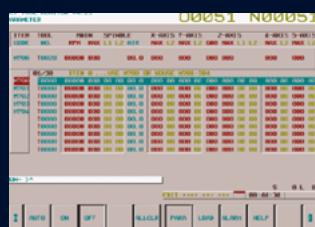

- Tool magazine control
- Tool state display
- Fastems Tool Add/Remove Function

option

### Tool management II option

- Tool magazine control
- Tool life management
- Tool life prediction
- Tool state control
- Balluff Tool ID function

### Tool load monitor option

- Detection of tool damage
- Detection of abnormalities during operation
- Detection of no-load air cutting

## Productivity improvement functions

### Adaptive Feed Control

Function to control feedrate so that the cutting can be carried out at a constant load

### APC Setting Screen

A simple automation function that supports automatic processing of the next pallet by setting the processing program for each pallet of the equipment including APC in advance

### Work Load Control

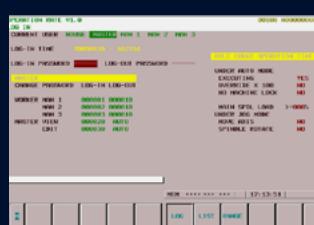

Optimal machining values can be automatically entered into parameters according to the weight of the workpiece placed on the table

### PMC Soft Panel Switch

Manual operations that occur continuously in each stages for APC,ATC change command

## Operation support, Help desk functions

### Operation rate

- Measure various machine operating rate
- Support 3 shift operation
- calculate and save 30 days operating rate
- Show data for a specific period

### Pattern Cycle

A function to automatically create frequently used part programs.

### Renishaw GUI

Renishaw tool length measuring and compensate function

### Spindle Warm Up

A function that assists spindle warm-up for spindle life when the spindle has not been used for a certain period of time

# CONVENIENT OPERATION

## SIEMENS 840D

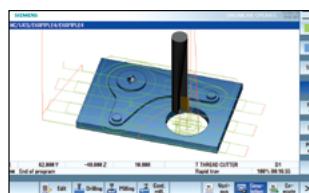

### 15.6" screen + new operation panel

The newly-designed operation panel improves the customer convenience by incorporating and using common-design buttons and layouts, and includes the familiar QWERTY keyboard for fast and easy operation.

- Provide 15.6" wide screen in the standard model
- 10MB high capacity user memory
- USB & ethernet (standard)
- QWERTY keyboard (standard)
- High-speed calculation and simulation can be fulfilled by improved processor functionality

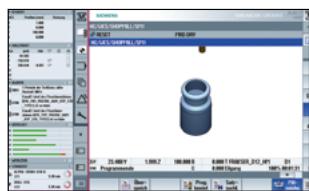

### Conversational convenient function

Simulation and machining contour monitoring

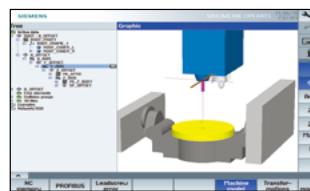

Smart function

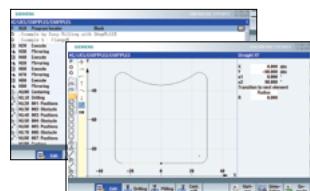

Side screen widget

5-axis kinematic measuring cycles

3D collision avoidance and collision avoidance ECO

Shop mill part programming

# WHY DN SOLUTIONS

The DN Solutions promise, MACHINE GREATNESS, has two important meanings. The first is simple: DN Solutions makes great machines. The second is a challenge to our end-users. With a product line that is this comprehensive, accurate and reliable, we equip our customers to machine greatness. The big question: ***Why should you choose DN Solutions over other options?***

Here's why...

## MACHINE GREATNESS™

WHAT YOU MAKE AND HOW YOU MAKE IT MATTERS—SO MAKE IT GREAT WITH DN SOLUTIONS.

### UNBEATABLE MACHINES

You won't find a more comprehensive range or a better combination of value, performance and reliability anywhere else.

### READYLY AVAILABLE - ANYWHERE IN THE WORLD

Machining centres (including 5-axis machines), lathes, multi-tasking turning centres and mill-turn machines, and horizontal borers with best-in-class specifications are all available...ready to install.

### ROBUST PRODUCT LINE

We offer an impressive range of machine models and hundreds of configurations. Whatever your machining needs and requirements, there's a DN Solutions for you.

### EXPERT SERVICE

Our dedicated, experienced and knowledgeable team is totally committed to improving your productivity, growth and success.

# CUSTOMER SUPPORT AND SERVICES

## We're there for you whenever you need us.

We help our customers operate at maximum efficiency by providing them with a range of tried, tested and trusted services - from pre-sales consultancy to post-sales support.

### FIELD SERVICES

- On-site service
- Machine installation and testing
- Scheduled preventive maintenance
- Machine repair service

### PARTS SUPPLY

- Supplying a wide range of original DN Solutions spare parts
- Parts repair service

### TRAINING

- Programming, machine setup and operation
- Electrical and mechanical maintenance
- Applications engineering

### TECHNICAL SUPPORT

- Supports machining methods and technology
- Responds to technical queries
- Provides technical consultancy

# RESPONDING TO CUSTOMERS **ANYTIME, ANYWHERE**

## DN Solutions Global Network

DN Solutions provides systems-based professional support services, before and after the machine tool sale, by responding quickly and efficiently to customers. By supplying spare parts, product training, field service and technical support, we provide the expert care, attention and assistance our customers expect from a market leader.

Global sales and service support network
